

CARBON FOOTPRINT POLICY

Bluevale Structures Ltd is committed to conducting their business in a manner which is both professional and ethical whilst at all times paying attention to reducing Carbon Footprint:

The following will be implemented in order to reduce Carbon Footprint:

- Ensure vehicle have their maintenance according to schedule, to keep vehicle running efficiently
- Ensure vehicle tyres are properly inflated. This will and save 400 – 700 pounds of CO₂ per year
- Only use the lights you need. If you're using your computer, you may not need your office lights on too
- Reduce where practicable, the need for any unnecessary travel and for the transportation of stores and equipment in the most efficient manner possible
- Seek to minimise waste and encourage our staff to avoid any wasteful use of materials
- Encourage energy savings throughout the company by ensuring that all power appliances and equipment are switched off when not in use
- Re-use of parts and components where possible and encourage the re-use of stationary items such as files, folders and other office stationery until it is unserviceable
- Bulk wastepaper disposals will be sent to a recycling unit

This Carbon Footprint Policy Statement will be explained to and a copy given to all employees when they start with the company and a new copy will be provided and explained when this policy is updated.
