

SUSTAINABILITY POLICY

Bluevale Structures Ltd are a company that operates throughout the UK we recognise the need to develop and conduct business in a way that will not affect the needs of future generations. We are committed to operating in a manner which reflects the UK Governments principles of sustainability development.

Our sustainability policy is to:

- Ensure sustainability is considered in the design, procurement and delivery of our services and products.
- Integrate a sustainable approach to our operations which will promote environmental, social and economic benefits.
- Strive for continual improvement
- Comply with or exceed all applicable legal requirements.

This will be achieved by:

- Protect and improve the environment wherever we can.
- Minimise use of the earth's natural and non-renewable resources throughout the company's activities.
- Minimise waste production where possible, by employing sustainable work practices, careful material selection and encouraging re-use and recycling.
- Develop staff training and raising staff awareness.
- Encourage staff to embody the principles of Sustainable Development into their day-to-day working activities including travel and use of energy-saving devices.
- Through responsible procurement, support sustainability in our supply chain
- Develop innovative and cost-effective solutions to meet client's aspirations for sustainability.
- Work with client's advisers and suppliers to develop new or alternative methods for reducing energy use throughout all aspects of both client and company business and promote the use of energy from renewable resources and energy-saving devices.

The responsibility for the implementation of this policy lies with the Managing Director
